

User Login Required for CONSULT III Plus Re/programming and Configuration

Reference: IPSB/17-076

Date: November 8, 2017

Attention: Service Directors and Service Managers

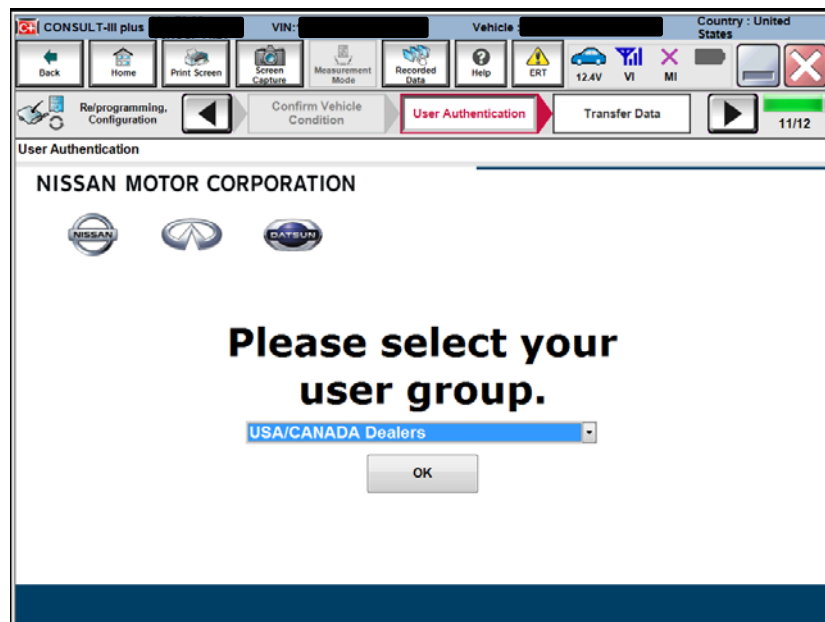

ANNOUNCEMENT

Beginning on November 13, 2017 with release of software version 73.1, technicians will be required to login with a username and password to perform Re/programming and Configuration in CONSULT III Plus. The username and password required is the same one used for login to NNAet.com. Each technician should currently have NNAet.com login credentials distributed by the Service Manager. If needed, see your Service Manager for username and password assistance.

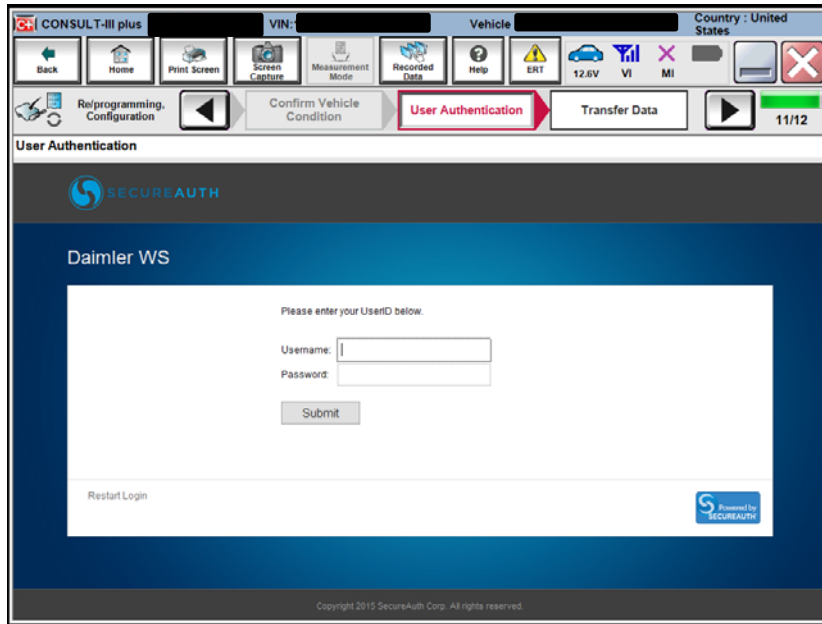

Note: Your CONSULT III Plus PC must be connect to the Internet via Wi-Fi or LAN cable.

Proceed with your normal Re/programming and Configuration steps in CONSULT III Plus. The user authentication step will be displayed just prior to the Re/programming or Configuration data transfer. See screens below. Once your login has been verified, the Re/programming and Configuration will automatically begin.

Select USA/CANADA Dealers

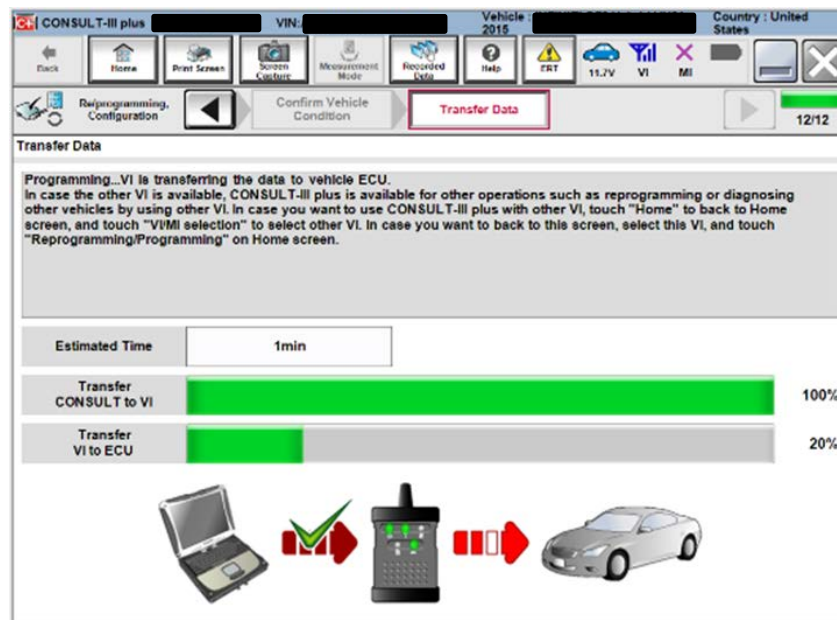

Input Username & Password

The screen displays the 'User Authentication' interface. At the top, there is a navigation bar with icons for Back, Home, Print Screen, Screen Capture, Measurement Mode, Recorded Data, Help, ERT, 12.5V, VI, MI, and a close button. Below this is a secondary bar with 'Reprogramming, Configuration', 'Confirm Vehicle Condition', 'User Authentication' (highlighted with a red box), and 'Transfer Data'. The main area is titled 'Daimler WS' and contains a login form with fields for 'Username:' and 'Password:', a 'Submit' button, and a 'Restart Login' link. A 'SECUREAUTH' logo is in the top left of the main area, and a 'Powered by SECUREAUTH' logo is in the bottom right. The footer shows 'Copyright 2015 SecureAuth Corp. All rights reserved.'

Example: Transfer of Data Begins After Login Verified
